

**A Review of the
Southeast Arkansas Technical Violator Program
(Female Program)**

From Program Start Through May 31, 2007

Background of the Program

The Southeast Arkansas Technical Violator Program (SEA-TVP), which opened in November 2003, is a 25 bed female unit for offenders who violated conditions of parole without committing a new crime. Eligible offenders may sign a waiver to the program in lieu of jail or return to prison. Initial confinement is for a 60 day period. Offenders who return to SEA-TVP after their first admission into the program may be held up to 90 days.

The intent of the program is to teach, promote and encourage positive cognitive and behavioral change that will result in a crime free lifestyle. It is the goal of this program to create a safe environment where residents will be provided the opportunity to examine their lifestyles, identify problem areas and practice new behaviors. SEA-TVP targets alcohol/drug addiction and the addictive criminal lifestyles. During the course of the program, emphasis is placed on acknowledging past problems, accepting responsibility for negative actions and practicing new behaviors that will lead to long-term change.

The staff at SEA-TVP interact as a team, with each member being constantly involved in the security and treatment process. This consistency allows the offender a more structured base for recovery and presents a united front.

Parole/Probation personnel work closely with SEA-TVP staff coordinating intake and release and ensuring that aftercare plans are followed and the continuity of care continues after release.

The foremost goal of SEA-TVP, is for each offender to leave the program having acquired basic recovery skills that will provide a basis for long-term change, while simultaneously relieving overcrowding in jails and prisons in Arkansas.

Report Methodology and Summary

Utilizing the database maintained by DCC on offenders under supervision, staff reviewed the total number of offenders who were admitted to and released from the SEA-TVP between November 1, 2003 and May 31, 2007.

The results of the review indicate that during that time period, there were 390 intakes to the SEA-TVP and 368 releases from the program. Three (3) offenders (less than 1% of the total) were transferred directly to ADC prior to their release because they did not meet program criteria.

Of those released to community supervision, 52 offenders had at least 1 re-admission to SEA-TVP and 62 offenders were subsequently incarcerated in an ADC unit or a DCC center following their initial release from SEA-TVP. Five (5) offenders released previously from the SEA-TVP were being held in a county jail awaiting incarceration in a DCC or ADC facility or return to the TVP program.

Intakes by Month Since January 2006 to Date

As of May 31, 2007 the total estimated costs resulting from the SEA-TVP totaled \$1,059,753. This compares to an estimated cost of \$4,907,179 for a 9 ½ month prison sentence. Nine and a half months was the average length of time parole violators spent in prison prior to the opening of SEA-TVP. This figure is based on an estimated per day prison cost of \$48.24 and a per day DCC incarceration cost of \$45.69.

* - A monthly count of releases was not available until January 2006. Releases through December 2005 totaled 192.

Recidivism of SEA-TVP Releases

Through May 2007, 62 of 308 offenders have been incarcerated following their release from SEA-TVP. This represents 19.2% of 308 offenders released.

Of all recidivists, 53 (17.2% of all offenders) were subsequently incarcerated in an ADC unit and 6 (1.9% of all offenders) were incarcerated in a DCC facility. Five (5) offenders were in county jail backup awaiting incarceration or return to SEA-TVP.

Table 1

SEA-TVP Recidivism Detail
November 2003 through May 2007

	Number of Offenders	Pct. of Recidivists	Pct. of All Releases
DCC Facility	6	10.2%	1.9%
McPhereson	53	89.8%	17.2%
Total	59	100%	19.2%
